

## INDEX TO VOLUME 43

The asterisk (\*) preceding the page number indicates an original article in the Archives. Subject entries are made for all articles. Author entries are made for original articles and society transactions. Book Reviews, Obituaries and Society Transactions are indexed under these headings in their alphabetical order under the letters B, O and S, respectively.

**Abdomen**, acute abdominal syndromes of hypophysial origin, 1238  
**Abnormalities and Deformities**: See also under names of diseases, organs and regions, as Corpus Callosum, absence of; etc.  
 maternal age, order of birth and developmental abnormalities, 1232  
**Abscess**: See under names of organs and regions, i. e., Brain, abscess; Spine, abscess; etc.  
**Accidents**: See Trauma  
**Accommodation**: See Eyes, accommodation and refraction  
**Acetylcholine**: See Choline and Choline Derivatives  
**Achromatopsia**: See Color Blindness  
**Acid**, glutamic, in malignant tumors, 377  
 iodoacetic, effect on carbohydrate metabolism of isolated mammalian tissues, 146  
 Nicotinic: See Sclerosis, multiple; etc.  
**Acid-Base Equilibrium**, adjustment of acid-base balance of patients with petit mal epilepsy to overventilation, \*262  
**Activity**, effect of continuous light on periodic spontaneous activity of white-footed mice (*Peromyscus*), 817  
 increased spontaneous activity and food intake produced in rats by removal of frontal poles of brain, 584  
**Adenoma**, anterior pituitary tumor associated with cachexia, hypoglycemia and duodenal ulcer, 386  
 Cushing's syndrome: report of case in which no endocrine tumor was found, 394  
 pituitary adenomas: follow-up study of surgical results in 338 cases (Dr. Harvey Cushing's series), 158  
**Adle Syndrome**: See Reflex, pupillary; Reflex, tendon  
**Adrenals**, juvenile form of adrenogenital syndrome, 394  
**Adson, A. W.**: Tuberculoma of brain, \*635  
**Aegerter, E. E.**: Possible etiologic role of arsenic in disturbances of central nervous system attributed to avitaminosis with reference to pellagra: report of case with autopsy, \*356  
**Age**, age of onset of epilepsy: differences between deteriorated and nondeteriorated patients, 825  
 Old: See Old Age  
**Aggression** in early childhood, 384  
**Anosia**: See Perception  
**Albumin**: See Cerebrospinal Fluid, proteins  
**Alcohol**: alcohol-tobacco amblyopia treated with thiamin chloride, 161  
 effects of ethyl alcohol on cerebral cortex and hypothalamus of cat, \*334  
**Alcoholism**: See also Delirium tremens; Korsakoff Syndrome  
 chronic, peculiar anatomoclinical form: alcoholic laminar cortical sclerosis, 1227  
 specific motility psychosis in Negro alcoholics, 592  
**Alexander, F.**: Sigmund Freud, 575  
**Allergy**: See Anaphylaxis and Allergy

**Alpers, B. J.**: Use of syntropan in treatment of parkinsonism; preliminary report, 1266  
**Alzheimer's Disease**: See Insanity, presenile  
**Amaurosis**: See Blindness  
**Amblyopia**: See Blindness  
**Amentia**: See Feeble-mindedness; Insanity; Mental Diseases; etc.  
**Amnesia**, hysterical, relieved by induced convulsions, 823  
**Amyotrophy**: See Atrophy, muscular  
**Analgesia**: See Anesthesia; Pain  
**Anaphylaxis and Allergy**: See also Asthma; etc.  
 allergic vertigo, 1244  
 clinical problems of migraine in children, 160  
 reaction of cerebral vessels to intracarotid injection of horse serum in sensitized and nonsensitized guinea pigs, 584  
**Andrew, W.**: Apparent dedifferentiation of nerve cells of human brain as result of prolonged starvation, \*1188  
**Androgens**, conversion by human of testis hormone, testosterone, into urinary androgen, androsterone, 377  
**Anemia**, psychoses with pernicious anemia, 1230  
**Anesthesia**, cerebral complications following surgical operation, 1022  
 cerebral complications of surgical operations; clinicopathologic study, 409  
 physicochemical mechanisms in convulsive reactivity, 377  
**Anesthetics**: See Anesthesia  
**Aneurysm**, intracranial, involving carotid artery and its branches, 184  
**Angioma**, diffuse angiomatosis of medulla oblongata and spinal cord with central gliosis, syringomyelia, cyst of pancreas, renal cysts and cystic hypernephroid tumors of both kidneys (Lindau syndrome), 1030  
 Sturge's disease, 838  
**Angioscintoma**: See Scotoma  
**Anomalies**: See Abnormalities and Deformities; and under names of organs and regions, as Corpus Callosum, absence of; etc.  
**Anorexia**: See Appetite  
**Anosognosia**: See Perception  
**Anoxemia**: See Oxygen, deficiency  
**Anxiety**, clinical study of anxiety attacks, \*102  
**Aphasia**, hereditary word blindness as defect of selective association, 837  
**Apoplexy**: See Brain, hemorrhage  
**Apparatus**, chair for encephalography adapted to children and adults, \*572  
 physiology of concussion, \*270  
**Appetite**, anorexia nervosa, 1255  
 anorexia nervosa and its immediate therapy, 823  
**Arachnoid**, inflammation; intraorbital arachnoiditis, 156  
**Arachnoiditis**: See Arachnoid, inflammation  
**Arieff, A. J.**: Remissions in epileptic patients treated with sodium bromide in outpatient clinic, \*299  
**Arling, C. D.**: Flaccid hemiplegia in man, \*302  
**Arsenic and Arsenic Compounds**, possible etiologic role of arsenic in disturbances of central nervous system attributed to avitaminosis with reference to pellagra: report of case with autopsy, \*356  
**Arteries**: See Aneurysm; Blood pressure; Embolism; Vasomotor System; etc.  
**Cerebral**: See Brain, blood supply  
**Retinal**: See Retina, blood supply

- Arteriography: See Brain, blood supply
- Asthma: See also Anaphylaxis and Allergy  
psychogenic factors in, 821
- Astrocytoma, cerebellar, 150
- of medulla oblongata, pons and peduncle, 590
- Athetosis and paralysis agitans; manifestations and methods of treatment, 170
- globus pallidus in athetosis and paraballismus, 381
- Atrophy: See also under names of organs and regions, as Brain, atrophy; Cerebellum; etc.
- Muscular: See also Dystrophy, muscular
- muscular; pathologic changes in polyradiculitis, 392
- trauma and progressive muscular atrophy, 601
- Avicenna, eminent opium user, 1038
- Avitaminoses: See under Vitamins
- Bacilli:** See Bacteria
- Backache, intraspinal causes of low back and sciatic pain; results in 60 consecutive low lumbar laminectomies, 599
- Bacteria: See also Streptococci; etc.
- Abortus and Meltense Group: See Undulant Fever
- meningitis due to *Micrococcus tetragenus*, 593, 1020
- Balken, E. R.: Use of fantasy tests in differential psychiatric diagnosis, 1249
- Bang's Disease: See Undulant Fever
- Barré-Guillain Syndrome: See Nerves, roots
- Basophilism (Cushing): See under Pituitary Body
- Basophils: See Pituitary Body
- Becker, N. G.: Status epilepticus as complication of metrazol convulsive therapy, \*993
- Becker, R. F.: Relation of anoxemia to early activity in fetal nervous system, \*90
- Bee Venom: See Venom
- Behavior, Children's: See Children
- Behrend, A.: Cerebral complications of surgical operations; clinicopathologic study, 409
- Belladonna, Therapy: See Encephalitis; Parkinsonism
- Bender, M. B.: Dissociation of deep sensibility at different levels of central nervous system, \*488
- Berger Rhythm: See Brain, physiology
- Blach, R. W.: Serum protein, nonprotein nitrogen and lipoids in schizophrenic and manic-depressive psychoses, \*932
- Birth, Order of: See under Family
- Bismuth and Bismuth Compounds, Therapy: See Dementia Paralytica; Syphilis
- Bladder, surgical treatment of stubborn neuroalgia of, 1026
- Blaurock, M. F.: Studies on familial periodic paralysis, 416
- Blindness: See also Vision
- alcohol-tobacco amblyopia treated with thiamin chloride, 161
- sudden amaurosis 15 days after cranial traumatism, 169
- visual hallucinations in blind, 168
- visuopsychic apparatus and accommodation reflex, \*1185
- Word Blindness: See Aphasia
- Blood, adjustment of acid-base balance of patients with petit mal epilepsy to over-ventilation, \*262
- carbon dioxide, variations in epilepsy, \*223
- chemistry; metrazol shock treatment, 821
- choline esterase; physiologic studies in insulin treatment of acute schizophrenia, 1010
- circulation; relation between nervous system and circulation based on observations during operations on man, 1236
- circulation; temporary arrest of circulation to central nervous system; physiologic effects, \*615
- coagulation necrosis in center of area of softening in senile brain, 152
- Blood—Continued
- coagulation; thrombokinas from brain: action of lecithin on thrombokinas of dabola venom and of brain extracts, 378
- Diseases: See Anemia; Leukemia
- enzymes; studies in multiple sclerosis, \*59
- influence of insulin and of stimulation of sympathetic nervous system on blood; study of sugar content, carbon dioxide tension and *pn*, \*726
- metabolism of brain before and after insulin and metrazol treatment, as determined by oxygen and carbon dioxide contents of blood, 1248
- metrazol convulsions; changes in oxygen, carbon dioxide and sugar contents of arterial and of internal jugular venous blood, \*682
- minerals; physiologic studies in insulin treatment of acute schizophrenia, 1010
- nitrogen, variations after cerebral and meningeal hemorrhages, 1015
- pressure changes following insulin shock treatment, 583
- pressure; effect of insulin shock on heart and blood pressure in treatment of schizophrenia, \*784
- pressure, high; case of essential hypertension with treatment by psychoanalysis, 852
- pressure in cardiazol [metrazol] epilepsy, 1013
- pressure, low; relationship of orthostatic hypotension to myasthenia gravis, 1275
- pressure, low; transient paralysis from postural hypotension, 593
- pressure; physiology of concussion, \*270
- protein, nonprotein nitrogen and lipoids in schizophrenic and manic-depressive psychoses, \*932
- sugar; anterior pituitary tumor associated with cachexia, hypoglycemia and duodenal ulcer, 386
- sugar; cerebral damage in hypoglycemia, 1016
- sugar; effect of insulin hypoglycemia and Bi-avitaminosis on acetylcholine content of brain, 149
- Bones, Diseases: See Osteomyelitis; etc.
- growth; cleidocranial dysostosis, 838
- BOOK REVIEWS:**
- Babies Are Human Beings; C. A. Aldrich and M. M. Aldrich, 613
- Clinical and Experimental Studies in Personality; M. Prince, 426
- Control of Circulation of Blood; R. J. S. McDowall, G. E. Malcomson and I. McWhan, 192
- Embolies cérébrales; M. Villaret and R. Cachera, 614
- Genetics of Schizophrenia; F. J. Kallmann and S. T. Rypins, 857
- Guiding Human Misfits: Practical Application of Individual Psychology; A. Adler, 1056
- Intracranial Tumors of Infancy and Childhood; P. Bailey with collaboration of D. N. Buchanan and P. C. Bucy, 613
- Measurement of Adult Intelligence; D. Wechsler, 614
- Nursing Mental Diseases; H. Bailey, 192
- Occupational Treatment of Mental Illness; J. I. Russell, 193
- Problems of Aging: Biological and Medical Aspects, 855
- Problems of Functional Correlation of Vegetative Nervous System; A. M. Grünstein, 1278
- Psychische Restitutionseffekt; O. Löwenstein, 1056
- Report on Cardiazol Treatment and on Present Application of Hypoglycaemic Shock Treatment in Schizophrenia; W. R. Thomas and I. G. H. Wilson, 193

BOOK REVIEWS—Continued

- Social Forces in Personality Stunting; A. H. Kamiat, 425
- Theories of Sensation; A. F. Rawdon-Smith, 426
- Book on dementia praecox for distribution, 815
- Bourneville's Disease: See Sclerosis, tuberosus
- Bouton, S. M., Jr.: Cerebral air embolism and vital staining; contribution to experimental study of blood-brain barrier, \*1151
- Bowles, L.: Histologic changes following metrazol convulsions with note on fuchsinophilic reaction as index of early neurocytologic change, \*948
- Boyd, D. A., Jr.: Pick's disease with atrophy of temporal lobes; clinicopathologic study, \*210
- Bradford, F. K.: Meningioma showing sarcomatous degeneration, \*778
- Brain: See also Cerebellum; Corpus Callosum; Corpus Striatum; Hypothalamus; Lenticular Nucleus; Medulla Oblongata; Meninges; Nervous System; Pons Varolli; Thalamus; etc.
- abscess of right frontal lobe revealed by trauma of left orbit, 159
- abscess of 7 years' duration, 1269
- apparent dedifferentiation of nerve cells of human brain as result of prolonged starvation, \*1188
- atrophy; Alzheimer's disease with Pick's atrophy of frontal lobe, 589
- atrophy; cerebral cortical calcification simulating Pick's disease, 586
- atrophy; convulsive states with evidence of brain hemiatrophy, 594
- atrophy; differentiation of Alzheimer's and Pick's disease, 159
- atrophy; hemiatrophy of brain, 151
- atrophy; Pick's disease with atrophy of temporal lobes; clinicopathologic study, \*210
- Blood Supply: See also Aneurysm; etc.
- blood supply; biochemical changes occurring in cerebral blood during insulin treatment of schizophrenia, 147
- blood supply; intracerebral distribution of arteries originating from meningeal vessels, 1225
- blood supply; physiologic regulation of cerebral circulation, \*804
- blood supply; reaction of cerebral vessels to intracarotid injection of horse serum in sensitized and nonsensitized guinea pigs, 584
- blood supply; role of arteriography in neurosurgery, 602
- calcification; cerebral cortical calcification simulating Pick's disease, 586
- central nervous system changes produced by insulin, 818
- cerebral complications following surgical operation, 1022
- cerebral complications of surgical operations; clinicopathologic study, 409
- cerebral lesions due to vasomotor disturbances following brain trauma, 587
- changes in experimental phosphorus poisoning, 152
- colloid cysts of third ventricle; report of 4 cases, \*510
- comparative pathoanatomic investigations with reference to senile changes, 152
- congenital demyelinating encephalopathy, \*111
- cranial injuries, 160
- Diseases: See also Encephalitis; Insanity; Mental Diseases; etc.
- diseases; agnosias and body scheme, 594
- diseases; cerebral damage in hypoglycemia, 1016
- diseases; compulsive grasping, grasp reflex, tonic innervation and associated phenomena, 149
- diseases; human electroencephalogram, 1245

Brain—Continued

- diseases; specific motility psychosis in Negro alcoholics, 592
- effects of ethyl alcohol on cerebral cortex and hypothalamus of cat, \*334
- epileptogenic lesions; histologic study, \*240
- experimental disseminated encephalopathy in monkey, \*195
- external geniculate bodies; degeneration studies following occipital lobectomy, \*997
- fatal traumatic disorders of brain, especially Berner's hemorrhages in medulla oblongata, and their medicolegal significance, 1235
- flaccid hemiplegia in man, \*302
- hemigenesis of prosencephalon, 841
- Hemorrhage: See also under Encephalitis
- hemorrhage; apoplexy in early life, 1022
- hemorrhage; variations in nitrogen of blood after cerebral and meningeal hemorrhages, 1015
- hernia; clinicopathologic consideration of displacement and herniation of hippocampal gyrus through incisura tentorii, 1040
- increased spontaneous activity and food intake produced in rats by removal of frontal poles of brain, 584
- Inflammation: See Encephalitis
- Injuries: See also Cranium, fractures; Head, injuries
- injuries; after-examination of patients with uncomplicated concussion of brain with regard to importance of duration of primary rest in bed, 390
- injuries; physiology of concussion, \*270
- injuries; pseudotabetic and pseudoparalytic pictures in concussion psychoses, 385
- lesions causing paraplegia in flexion, \*752
- localization of function; autonomic functions of cerebral cortex, 148
- localization of function; cerebral association pathways, 581
- localization of function; cortical spread of epileptic discharge and conditioning effect of habitual seizures, 1009
- localization of function; interpretations of functions of frontal lobe based on observations in 48 cases of prefrontal lobotomy, 157
- localization of function; modification of Gудden method for study of cerebral localization, \*46
- localization of function; nucleus of oculomotor nerve with reference to innervation of pupil and fibers from pretectal region, 581
- localization of function; physiology of mid-brain, 378
- metabolism before and after insulin and metrazol treatment, as determined by oxygen and carbon dioxide contents of blood, 1248
- mineral content; changes in experimental animals following injections of insulin and metrazol, \*463
- neurohistopathologic changes with metrazol and insulin shock therapy; experimental study on cat, \*1108
- pathologic changes produced by metrazol, 153
- pathology; choreoathetosis and infracortical nervous mechanisms, 1247
- pathology; coagulation necrosis in center of area of softening in senile brain, 152
- pathology; diffuse disease of cerebral hemispheres following carbon monoxide poisoning, with remission, 819
- pathology; hereditary occurrence of Alzheimer's disease with comments on process of aging in brain, 597
- pathology; neurologic sequelae of kernicterus, 1246
- personality changes accompanying cerebral lesions; Rorschach studies of patients with cerebral tumors, \*859
- personality changes accompanying cerebral lesions; Rorschach studies of patients with focal epilepsy, \*1081

## Brain—Continued

- physiology; association of homonymous hemianopia and unilateral absence of alpha waves, 1273
- physiology; cessation of epileptic seizures and electroencephalogram, \*1007
- physiology; changes in electroencephalogram during metrazol therapy, \*341
- physiology; clinical applications of electroencephalography, 834
- physiology; cortical alpha rhythm in thyroid disorders, 583
- physiology; electrical activity of exposed human brain; description of technic and report of observations, \*547
- physiology; electroencephalogram as aid in clinical neurology, 834
- physiology; electroencephalogram in cases of neoplasms of posterior fossa, \*472
- physiology; electroencephalogram in healthy relatives of epileptics; constitutional elements in "idiopathic epilepsy," 825
- physiology; electroencephalogram of psychotic patients, 582
- physiology; electroencephalographic studies on epilepsy, 149
- physiology; human electroencephalogram, 1245
- physiology; normal bioelectric manifestations in human brain, 1227
- physiology; physicochemical mechanisms in convulsive reactivity, 377
- physiology; spread of epileptic discharge; experimental study of after-discharge induced by electrical stimulation of cerebral cortex, \*429
- relation of pupillary reactions and diencephalon, 1016
- relation of ventricular asymmetry to contracting intracranial lesions, \*80
- roentgenography; chair for encephalography adapted to children and adults, \*572
- roentgenography; production and localization of headache with subarachnoid and ventricular air, \*326
- roentgenography; tumor of thalamus; ventriculographic entity, 836
- roentgenography; ventriculographic diagnosis of agenesis of corpus callosum, \*139
- sealing specimens with piliolm; practical and inexpensive way to exhibit specimens, \*1205
- surgery; study of effect of right frontal lobectomy on intelligence and temperament, 1226
- syphilitic cerebral hypertrophic pachymeningitis; clinicopathologic studies in case, \*362
- thrombokinas from brain; action of lecithin on thrombokinas of dabola venom and of tuberculoma of, \*635
- tumor of third ventricle causing hydrocephalus; report of case, 396
- tumors, and olfactory hallucinations, 168
- tumors; astrocytoma of medulla oblongata, pons and peduncle, 590
- tumors; bilateral subfrontal tumor with affective symptoms, 596
- tumors; cranioopharyngioma in third ventricle of brain; partial surgical removal and pathologic study, \*1195
- tumors; differential diagnosis between tumor of brain and meningitis based on spinal fluid findings, 381
- tumors; electroencephalogram as aid in clinical neurology, 834
- tumors; electroencephalogram in cases of neoplasms of posterior fossa, \*472
- tumors; epileptic phenomena associated with tumors of temporal lobe, 1045
- tumors; localizing value of incongruity in defects in visual fields, 165
- tumors; metastatic melanoblastomas, 379
- tumors; primary fibrosarcoma, 379
- tumors; psychic disturbances accompanying tumors of orbital part of frontal lobe, 388

## Brain—Continued

- tumors; radiotherapy of intracranial tumors with reference to treatment of pituitary tumors, 163
- tumors; roentgenologic symptom of tumors of posterior fossa, 602
- tumors; role of arteriography in neurosurgery, 602
- tumors; symptomatology of tumors of third ventricle, 386
- Brenner, C.: Comparison of Davies-Hinton and Wassermann reaction of spinal fluid, 605
- Brill, A. A.: Peculiar manifestations of memory with reference to lightning calculators, 1052
- Brodal, A.: Modification of Gudden method for study of cerebral localization, \*46
- Brody, B. S.: External geniculate bodies; degeneration studies following occipital lobectomy, \*997
- Brody, M. W.: Compulsive phenomena with associated oculogyric crises, 846
- Brosin, H. W.: Anorexia nervosa, 1255
- Buchstein, H. F.: Tuberculoma of brain, \*635
- Bucy, P. C.: Surgical treatment of unilateral choreoathetosis, 1274
- Bulgarian Treatment: See Encephalitis
- Cachexia, Pituitary:** See under Pituitary Body
- Calculators, peculiar manifestations of memory with reference to lightning calculators, 1052
- Cameron, D. E.: Certain aspects of defects of recent memory occurring in psychoses of senium, \*987
- Camphor, Therapy: See Dementia Praecox
- Cancer: See also Sarcoma; etc.; and under names of organs and regions, as Meninges; etc.
  - glutamic acid in malignant tumors, 377
- Cannabis, catatonic syndrome of acute cannabis psychoses, 823
- Capillaries: See Vasomotor System
- Carbohydrates, effect of iodoacetic acid on carbohydrate metabolism of isolated mammalian tissues, 146
- Carbon Dioxide, adjustment of acid-base balance of patients with petit mal epilepsy to over-ventilation, \*262
- in Blood: See under Blood
- Carbon Disulfide poisoning of nervous system, 598
- Carbon Monoxide, diffuse disease of cerebral hemispheres following carbon monoxide poisoning, with remission, 819
- Cardiazol: See Dementia Praecox; Metrazol
- Cardiovascular Diseases: See Heart
- Cardiovascular System: See Heart; Vasomotor System; etc.
- Case, T. J.: Association of homonymous hemianopia and unilateral absence of alpha waves, 1273
- Catalepsy, catatonic syndrome of acute cannabis psychoses, 823
- Catatonla: See Catalepsy; Dementia Praecox
- Cauda Equina: See Spinal Cord
- Caudate Nucleus: See Corpus Striatum
- Causalgia: See Neuralgia
- Cells: See Neurons; Tissue; etc.
  - Permeability: See Osmosis and Permeability
- Cephalin: See Lipoids
- Cephalocele: See Brain, hernia
- Cerebellum, astrocytoma, 150
  - atrophy; olivopontocerebellar atrophy, 590
  - central connections of vestibular pathways, 374
  - convulsions associated with tumors of cerebellum; clinical and pathophysiologic features, \*1163
  - gangliioneuroma of, 153
- Localization of Function: See Brain, localization of function
- medulloblastoma with survival for 5½ years, 839

- Cerebellum—Continued  
 pathologic picture and pathogenesis of medulloblastoma, 382  
 tumors; electroencephalogram in cases of neoplasms of posterior fossa, \*472
- Cerebrospinal Fluid: See also Meninges, permeability  
 differential diagnosis between tumor of brain and meningitis based on spinal fluid findings, 381  
 proteins; statistical study of clinical and pathologic significance, 401  
 tests; Davies-Hinton test of spinal fluid, 1245
- Cerebrum: See Brain
- Charcot's Disease: See Sclerosis, amyotrophic lateral
- Charcot-Marie's Disease: See Atrophy, muscular
- Chiasm, Optic: See Optic Chiasm
- Childe, A. E.: Relation of ventricular asymmetry to contracting intracranial lesions, \*80
- Children, direct psychotherapy of, \*1208  
 endocrine dyscrasias associated with conduct disorders in Colorado Springs children, 393  
 feeding of infancy and subsequent psychological difficulties, 1232
- Choked Disk: See Neuritis, optic
- Choline and Choline Derivatives, chemical mediation in crustaceans; acetylcholine and autotomy in *Petrolisthes armatus* (Gibbes), 817  
 effect of acetylcholine, prostigmine, potassium and fatigue on crossed extensor reflex and on its reflex inhibition in toad, 1015  
 effect of insulin hypoglycemia and B<sub>1</sub>-avitaminosis on acetylcholine content of brain, 149
- Choline Esterase: See Blood, choline esterase
- Chondroma, intracranial, 387
- Chorea, Huntington's, genealogical studies in, 595  
 monochorea and somatotopic localization, \*792  
 treatment of chorea and rheumatic infection by fever induction; further studies, 826
- Choreoathetosis: See Paramyoclonus multiplex
- Choriomeningitis: See Meningitis
- Chorobski, J.: Ventriculographic diagnosis of agenesis of corpus callosum, \*139
- Chromatophore: See under Pigmentation
- Chromesthesia, colored audition, 166
- Cleckley, H.: Histologic changes following metrazol convulsions with note on fuchsinophilic reaction as index of early neurocytologic change, \*948
- Climate as factor in epidemic meningitis in Kordofan, 156
- Cochlea: See Ear, internal
- Coleridge, Samuel T., eminent opium user, 1038
- Colon, lumbocervical neuralgias of colonic origin, 391
- Color Blindness, hemilachromatopsia with hemianopic hallucinosis, 167
- Concussion: See Brain, injuries
- Confusion, Mental: See under Insanity
- Constitution, constitutional differences between deteriorated and nondeteriorated patients with epilepsy, 824  
 transitory Frölich's syndrome on constitutional basis, 1239
- Contracture, paraplegia in flexion, \*736
- Convulsions: See also Epilepsy  
 associated with tumors of cerebellum; clinical and pathophysiologic features, \*1163  
 mineral content of brain; changes in experimental animals following injections of insulin and metrazol, \*463
- Cornea, Inflammation: See Keratitis
- Innervation of cornea; effects of trigeminal denervation, 1013
- Corpus Callosum, absence of; ventriculographic diagnosis of agenesis, \*139  
 tumor of, 387
- Corpus Geniculatum, external geniculate bodies; degeneration studies following occipital lobectomy, \*997
- Corpus Luysi: See Hypothalamus
- Corpus Striatum: See also Lenticular Nucleus  
 monochorea and somatotopic localization, \*792
- Correction in article by Dr. George W. Forman, entitled, "Dementia Paralytica: Effect of Continuous Intensive Therapy with Tryparsamide and Bismuth on Cerebrospinal Serologic Reactions and Frequency of Relapse" (42:1068 [Dec.] 1939), 614
- Corticospinal Tract: See Pyramidal Tract
- Costello, R. T.: Migraine and trigeminal neuralgia occurring in neuropathic family, 1045
- Cotton, J. M.: Vascular bed of retina in mental disease, \*891
- Cottrell, L.: Histologic variations with age in apparently normal peripheral nerve trunks, \*1138
- Craniology, historical note on meningiomas; study of hyperostoses in prehistoric skulls, 837
- Craniopharyngioma in third ventricle of brain; partial surgical removal and pathologic study, \*1195
- Cranium: See also Head  
 fractures; post-traumatic syndrome of thalamus and epiphysis, 389  
 historical note on meningiomas; study of hyperostoses in prehistoric skulls, 837  
 injuries: See Brain, injuries; Head, injuries  
 intradural extramedullary tumor (meningioma) involving spinal cord and extending into intracranial cavity; report of 2 cases, 178  
 paralysis of third cranial nerve accompanying increased intracranial pressure, 1025  
 pressure in; physiology of concussion, \*270  
 primary intracranial sarcomas, \*991  
 relation of ventricular asymmetry to contracting intracranial lesions, \*80  
 tumors; intracranial chondroma, 387  
 tumors; retinal arterial tension in cases of intracranial tumors; its importance for topographic diagnosis and its role in formation of choked disk, 1227
- Creatine and Creatinine, distribution in tissues of rat, dog and monkey, 147
- in Urine: See Urine, creatine
- Crime and Criminals: See also Jurisprudence, Medical; etc.  
 crimes committed in state of mental confusion, 1019
- Crouzon's Disease: See Bones, growth
- Curare, studies in physiology of embryonic nervous system; effect of curare on motor activity of chick embryo, 1011
- Cushing Syndrome: See under Pituitary Body
- Cystine and Cysteine, relationship between nature of vitamin B complex supplement and ability of homocystine to replace methionine in diet, 583
- Cysts: See under names of organs and regions, as Brain; Pancreas; etc.
- Daniels, L. E.: Paraplegia in flexion, \*736
- Darrah, L. W.: Sealing specimens of brain with plicofilm; practical and inexpensive way to exhibit specimens, \*1205
- Davies-Hinton Test: See Cerebrospinal Fluid, tests; Syphilis, serodiagnosis
